

PROCESSING CORE

Subnational Spatial Layers

- Proximity to Schools, Healthcare, and Market Hubs
- Regional Infrastructure & Transportation Connectivity
- Localized Economic Development Indices

Household Perception Survey

- Validated Institutional Trust Battery
- Immediate and Long-term Migration Intentions
- Perceived Career Ceilings & Socio-Economic Mobility

Geospatial Weighting Engine

- Distance Decay Functions (Inverse Distance Weighting [IDW] / Gaussian functions)
- Spatial Normalization of Perceptions via Kernel Density Estimation (KDE)

Geospatial Opportunity Accessibility Index (GOAI)

A new compound metric that numerically quantifies individual perceived opportunity landscapes across subnational zones.

Policy Alignment

Enables government stakeholders to target infrastructure investments directly to high-risk youth exit epicenters and monitor localized institutional trust recovery in real time.
