

1

MACRO-ENVIRONMENT (OBJECTIVE STIMULI)

The baseline structural reality of the country

Socio-Economic Indicators (WDI)

- GDP per capita
- Youth Unemployment Rate

Governance & Trust Metrics (WGI)

- Voice & Accountability
- Control of Corruption

Feeds External Stimuli into Perception

2

MICRO COGNITIVE PROCESS (SITUATION AWARENESS CYCLE)

The individual cognitive filter where the Perceived Opportunity Landscape (POL) is constructed.

[Stage 1: Perceive]

Individual observes localized infrastructure gaps and regional economic disputes.

[Stage 2: Comprehend]

Individual evaluates current institutional trust, systemic corruption, and local career viability.

[Stage 3: Project]

Mental simulation of personal future utility mapping; forming the Perceived Opportunity Landscape (POL).

Triggers Behavioral

Output / Strategy

3

BEHAVIORAL EXIT STRATEGY (DECISION OUTCOMES)

The resulting real-world actions taken by the youth cohort.

International Migration

The Exit option.
Results in a continuous external remittance loop and potential brain drain.

Democratic Resilience

The Voice option.
Results in a domestic innovation, civic participation, and institutional reform.
